PROFESSIONAL SUMMARY

Senior Backend Engineer with 4 years of experience specializing in PHP (Laravel) and Python (FastAPI, Flask) to architect high-availability, scalable backend systems. Proficient in system design, Clean Architecture, and microservices including Golang components. Experienced in automated DevOps deployments (AWS, Docker, CI/CD) and emerging AI solutions (LangChain, RAG). Adept at technical leadership, mentoring developers, conducting code reviews, and collaborating with stakeholders to deliver enterprise-grade software.

EXPERIENCE

Software Developer — Nutriiya, Mumbai Oct 2025 – Present

- Lead backend development (PHP/Laravel, Python), designing scalable architectures and enterprise REST APIs.
- Architected and scaled multiple applications across e-commerce, health, and nutrition domains on Hostinger.
- Orchestrate high-availability deployments (AWS, Docker, Linux, Apache, Nginx) with CI/CD and SSL setup.
- Configure reverse proxies, Supervisor queue workers, and system administration for seamless server operations.
- Spearheaded the migration of legacy monolithic systems into highly scalable, Dockerized microservices.
- Direct database schema design, indexing, and query tuning for high-volume PostgreSQL/MySQL databases.
- Integrated external payment gateways and built background jobs for automated order and data processing.
- Mentor junior developers, conduct rigorous code reviews, assign tasks, and plan system architecture.

Software Engineer — CreditFair Finance, Mumbai Aug 2022 – Oct 2025

- Architected and deployed 400+ secure REST APIs and microservices using PHP (Laravel), Python, and Go.
- Engineered secure, fault-tolerant backend systems for highly scaled fintech applications managing heavy traffic.
- Built AI data retrieval and chatbot systems using LangChain, RAG, ChromaDB, and LLMs to scale operations.
- Configured AWS cloud infrastructure (EC2, Lambda, RDS, S3), reducing costs by 50% via API optimization.
- Designed schemas, Auth/AuthZ, and caching layers for MySQL/MongoDB, providing production system support.
- Implemented Clean Architecture to decouple core fintech business logic from infrastructure and external APIs.
- Designed event-driven architectures and integrated robust queue systems for asynchronous task processing.
- Mentored developers, led production releases, and mapped business requirements to technical solutions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Engineering 2024 – Present

Shah & Anchor Kutchhi Engineering College, Mumbai

Diploma in Computer Technology 2019 – 2022

Government Polytechnic College, Pen

86%

PROJECTS

Production Infrastructure & Deployment

- Deployed 50+ production apps across AWS, Hostinger, IIS, Docker, Apache, and Nginx via CI/CD automation.

AI-Powered Data Retrieval System from DB

- Built a real-time AI system using LangChain, embeddings, and ChromaDB, enabling 4X faster data reporting.

CreditFair Chatbot – AI Virtual Assistant

- Developed an AI virtual assistant utilizing local LLMs and RAG frameworks, improving usability by ~200%.

FurnishHomes

- Built a Flask e-commerce platform with robust authentication, cart transactions, and Firebase integration.

TECHNICAL SKILLS

- Languages:** PHP, Python, Golang, JavaScript
- Frameworks:** Laravel, FastAPI, Flask
- Backend:** REST APIs, Microservices, MVC, Clean Architecture, AuthN/AuthZ, Queue Systems
- AI/ML:** LangChain, ChromaDB, RAG, Embeddings, LLMs
- Databases:** MySQL, PostgreSQL, MongoDB
- Cloud:** AWS (EC2, ECS, Lambda, RDS, S3)
- Servers:** Linux, Apache, Nginx, IIS, Hostinger
- DevOps:** Docker, Git, CI/CD, Reverse Proxy, SSL
- Leadership:** Tech Leadership, Code Reviews, Mentoring
